Trust & Commitment**

# Flanges & Fittings

Through our worldwide presence we manufacture **Flanges & Fittings** accordance with international standards

## Flanges

We are manufacturers & exporters of stainless steel and carbon steel flanges in accordance with the prevailing international standards. We are experts in manufacturing flanges including those with special features as well as non-standard dimensions with a full range of pressure class and in various grades of material. We specialize in supplying specialty flanges to the world's most demanding industries – Shipbuilding, Oil Refinery, Petrochemical, Chemical, Plumbing and Automotive industry. We fulfill every flange related need by substantially transforming both the forging and machining process from a raw piece to obtain high quality and close tolerance flanges.

## Fittings

Saini Flange manufactures Stainless Steel Hose Fittings and Threaded Pipe Fittings. These fittings are used in the industry of Steam, Gas, Oil and Water industry. Our major buyers of these fittings are mainly Flexible Hoses manufacturers. We cater to every kind of need in various combinations and permutations when it comes to highly customize special fittings for varying conditions.

# Vacuum/Exhaust Flanges

We'll meet your **engineering specs**, no matter what size the job, large or small, always give it our **undivided attention**.

## Vacuum Flanges

We offer a full range of High Vacuum and Ultra High Vacuum Flanges for vacuum applications made from stainless steel. We have an extensive range of KF/QF, ISO, CF and ASA flanges of Stainless Steel, which can work in adverse temperature and corrosive conditions. These flanges are used in HV/UHV applications such as gas, vacuum & steam chambers for both the equipment manufacturers and end users.

## Exhaust Flanges

Saini Flange machines a variety of Exhaust Flanges for various Automotive Exhaust Systems. We offer Bolt Up, Quick Release and Custom Designed Exhaust Flanges with high quality manufacturing from Stainless Steel and Carbon Steel. We know and understand the pressure involved in the supply of heat and corrosion resistant materials used in the Exhaust Flanges. The Exhaust flange can be of any size and shape with close tolerance.

# High Precision CNC Components

We'll not only build your part to spec.  
We'll test it to make **sure it's perfect.**

## High Precision CNC Components:

We are bespoke manufacturer of High Precision CNC components with the ability to access vast array of industry technology and products. Our factory is equipped with Modern CNC's & Conventional machines. Continuous improvements to every aspect of our manufacturing and business practices have kept us at the forefront of our industry. Listening to our customer's needs and supplying what they want, at a reasonable price, on time, has been our philosophy and will remain so. Uncompromising quality and prompt delivery is a matter of pride with us whatever quantity may be required.

Our customers typically approach us with similar frustrations: other machine shops don't have the right equipment and don't realize the impact of timely delivery on the bigger picture. Saini Flange is dedicated to quality manufacturing. We ensure our customers are given absolutely accurate, machined components within critical tolerances.

# About Us

Good business starts with good relationship. We realize the importance of customer service and strive to surpass all your expectations.

Saini Flange Pvt. Ltd. (An ISO 9001:2000 Co.) manufactures and exports flanges, fittings and high precision CNC components for Gas, Oil, Chemical, Water, Shipbuilding, Automotive, Food and Power Generation industry. We operate a fully modernized CNC Machining & Forging facility at outskirts of national capital New Delhi, India.

We invite you to learn about our entire product offerings, which include Flanges, Fittings, High Precision CNC Machined Components as well as our unparallel quality. We are engaged with our customers to understand their challenges and help them realize practical solutions. Using real world applications as the inspiration, Saini Flange leverages vast technical and practical experience to develop viable solutions.

A significant number of products are custom designed for specific customer applications and are developed to meet individual customer needs. The integration of CAD/CAM technology enables us to provide bespoke components.

From our humble beginnings in 1995, we have evolved into worldwide presence, thanks to our employees who continually excel at every challenge as well as to our customers who value our hard-work and newest technology.

We never compromise on quality be it any stage and handsomely compete in domestic & international market with élan. Strict quality control, keen pricing and efficient delivery are our hallmarks.
